

Saurabh M. Agrawal

Fullstack Architect | Cloud-Native Microservices | Frontend & Backend Expert - Dubai

Mobile: +971-568896895

Email: saurabh.agrawal.techie@gmail.com

LinkedIn: <https://linkedin.com/in/saurabh-agrawal-b9650915>

Address: B-820, Al Nawras Apartments, Al Nahda 1, Dubai.

Professional Summary

Seasoned software engineering professional with over 15 years of expertise in Java full-stack development, enterprise architecture, and cloud-native microservices. Demonstrated success managing end-to-end SDLC initiatives, modernizing legacy platforms, and architecting scalable enterprise solutions using the Java ecosystem (Spring Boot) and React.js. Proficient in Agile methodologies and renowned for rapid resolution of production-critical issues in high-pressure environments.

Awards & Recognitions

- **Recognition for Going Above & Beyond Award:** received for solely providing solutions quickly to multiple aged tasks.
- **You Made a Difference Award:** received for brilliantly completing an onsite assignment.
- **Project Performer of the Quarter Award:** received as a team leader for excellent deliverables.

Core Competencies

Programming Languages: Java 17+, JavaScript, TypeScript, Python

Frontend Development:

- **Frameworks & Libraries:** React.js (v16.8+), React Native, Angular (v17+), Next.js, Vue.js, Expo
- **State Management:** Redux Toolkit
- **UI & Styling:** Material UI, Tailwind CSS, Bootstrap
- **Runtime:** Node.js
- **Testing:** Jest, Enzyme, React Testing Library, Jasmine, Storybook

Backend Development:

- **Core Frameworks:** Express.js, NestJS, Spring Boot, Python Flask
- **Microservices & Resilience:** Eureka, Zuul, Resilience4j, Zipkin, Sleuth
- **Data Access:** JPA, Prisma
- **APIs:** GraphQL, Swagger
- **Testing:** JUnit, Mockito, PowerMock

Databases & Persistence:

- **Relational:** PostgreSQL, MySQL, SQL Server
- **NoSQL:** MongoDB, VectorDB

DevOps & CI/CD:

- **CI/CD Tools:** Jenkins, Ansible
- **Containerization & Orchestration:** Docker, Kubernetes
- **Scripting:** Bash, Perl

Development Tools & IDEs:

- **Build & Package Managers:** Maven, npm, Webpack, Vite
- **IDEs & Editors:** IntelliJ IDEA, Eclipse, VS Code
- **API Clients & Debugging:** Postman, SoapUI, Browser Developer Tools, Splunk

Cloud & Infrastructure:

- **Cloud Platforms:** Microsoft Azure, AWS
- **Containers & Orchestration:** Docker, Kubernetes

AI & Machine Learning:

- **Core Language:** Python
- **LLM Engines & Models:** Deepseek R1, Ollama
- **Techniques:** Retrieval-Augmented Generation (RAG) Model Training
- **Coding Assistants:** Github Copilot, Cursor, Claude Code.

Version Control: GitHub, GitLab, Bitbucket, Perforce

Operating Systems: Windows, macOS, Linux

Additional Competencies: System Architecture & Design (MS Visio), Web Development & Integration, Agile Methodologies, Team Leadership & Technical Writing

Work Experience

Company: Tech Vista LLC (Client: Etisalat)

From Date: 01/2025, **To Date:** Present

Location: Dubai, UAE

Job Title: Java Full Stack Architect

Technical Skills Used: Python, Ollama, Deepseek R1, Retrieval-Augmented Generation (RAG) Model Training, Next.js, Cursor.

Description:

- Developed proofs of concept for AI large language models through secure on-premises deployments, eliminating the risk of data exposure on third-party servers.
- Engineered a localized proof of concept to train the Deepseek LLM using a Retrieval-Augmented Generation (RAG) methodology.
- Completed comprehensive training on the Netcracker Cloud Integration Platform.
- Participating in the requirements-gathering sessions aimed at modernizing the legacy application stack as part of the Business Support System (BSS) transformation initiative.

Company: UBS AG

From Date: 03/2023, **To Date:** 10/2024

Location: Singapore, SG

Job Title: Java Full Stack Architect

Technical Skills Used: Java 17, React.JS, Next.js, Redux Toolkit, TypeScript, Kafka, MS Azure Cloud, Ansible.

Description:

- Implemented a Business Continuity Management (BCM) solution to resolve organization-level compliance blockers.
- Remediated a critical memory leak in the shared in-house library under tight deadlines, preventing production server outages by 95%.
- Engineered and deployed a modern UI for legacy applications using React.js and TypeScript, with state management handled by Redux.
- Designed an abstract presentation layer to integrate the new UI with legacy back-end systems, promoting loose coupling.
- Led the impact analysis and documentation for migrating 5+ services to Microsoft Azure cloud.
- Participated in a company-wide hackathon to drive innovation and cross-team collaboration.

Company: Aleph Labs (Client: UOB Bank)

From Date: 09/2022, **To Date:** 02/2023

Location: Singapore, SG

Job Title: Senior Full Stack Engineer

Technical Skills Used: React.JS, Material UI, Redux Toolkit, GraphQL, React Native, Expo, Node.JS, Express.JS, Vue.JS.

Description:

- Contributed to resolving 20+ critical defects in the Vue.js-powered UI.
- Initiated a technology stack upgrade by replacing the legacy Vue.js interface with React.js, Redux Toolkit, and Material-UI components.
- Delivered the revamped React.js UI with enhanced security features within a condensed timeframe.
- Enforced code quality through stringent ESLint configurations and rigorous peer reviews.
- Established an in-house shared component library to standardize the UI and reduce code duplication.
- Implemented layered architecture for Node.js APIs supporting the new React.js interface.
- Integrated CI/CD pipelines to automate builds and deployments for the application.
- Developed a React Native mobile application backed by a GraphQL APIs.

Company: HCL Software

From Date: 09/2019, **To Date:** 09/2022

Location: Pune, IN

Job Title: Technical Lead

Technical Skills Used: React.JS, Redux, React Native, Expo, Storybook, Material UI, Java, Node.JS, Spring, DoJo.

Description:

- Led the offshore development team, managing capacity for 6 engineers and overseeing end-to-end delivery.
- Ensured adherence to rigorous Agile methodologies and ceremonies throughout the software development lifecycle.
- Designed scalable microservices architecture using Node.js for legacy system transformation.
- Regularly facilitated backlog refinement sessions to prepare work items for seamless development.
- Conducted sprint capacity planning to distribute workload equitably and mitigate single-resource dependencies.
- Architected and delivered the new Contacts UI with fresh look using React.js, Storybook, Material-UI, and Redux.
- Consistently achieved 100% test coverage for the new Contacts UI application through stringent peer-review processes.
- Streamlined mobile app development by addressing bugs and introducing new features in tandem, using React Native.

Company: Wipro Digital

From Date: 02/2019, **To Date:** 08/2019

Location: Pune, IN

Job Title: Java Architect

Technical Skills Used: Java 8, React.JS, Redux

Description: Due to the absence of active project assignments in Wipro, I proactively sought new opportunities within a short timeframe.

Company: Nuance India Pvt. Ltd.

From Date: 06/2015, **To Date:** 02/2019

Location: Pune, IN

Job Title: Senior Software Development Engineer

Technical Skills Used: Angular 4, React.JS, Type Script, MobX, Redux, SQL Server, Spring Web, JPA, Web Sockets, SAML.

Description:

- Resolved defects and implemented product enhancements in the Angular 2–based user interface.
- Upgraded the application framework from Angular 2 to Angular 4.
- Migrated and refactored complex UI components from Angular 4 to React JS with TypeScript.
- Participated in the full product feature lifecycle, from database schema design through front-end implementation.
- Facilitated detailed requirement discussions and documentation during backlog refinement and Three Amigos sessions.
- Served as Scrum Master, guiding Agile ceremonies and pod coordination.
- Designed and developed RESTful backend APIs using Spring Web and Spring Data JPA for persistence operations.
- Ensured a minimum of 80% code coverage across newly written frontend and Java backend modules.
- Rapidly addressed and closed long-standing defects in legacy applications.
- Independently implemented browser-to-browser communication using WebSockets.
- Led the SAML integration effort by configuring an in-house test federation server.

Company: Cognizant Technology Solutions (Client: FAB Bank, Abu Dhabi)

From Date: 09/2013, **To Date:** 06/2015

Location: Pune, IN

Job Title: Associate – Projects

Technical Skills Used: Java 7, AngularJS, JBoss, RESTEasy, Spring.

Description:

- Enhanced a legacy internet banking platform by independently designing and implementing the iSave online account–opening feature using Oracle Database, Java 5, JSP, and JavaScript.
- Joined the insurance development team to architect and deliver a fully revamped version of the insurance system.
- Designed and implemented multiple RESTful APIs leveraging JAX-RS with the RESTEasy framework.
- Created Spring Data JPA facades to abstract and standardize CRUD operations.
- Built all new user interfaces using the AngularJS MVC framework.
- Developed the end-to-end insurance policy lifecycle workflow in the updated application.

- Authored comprehensive JUnit test suits utilizing Mockito for robust unit testing.
- Produced detailed technical documentation for each newly implemented feature.

Company: Infosys Limited (Client: Fujitsu)

From Date: 02/2012, **To Date:** 09/2013

Location: Pune, IN

Job Title: Technology Analyst

Technical Skills Used: Java 5, Struts 2.0, JSP, AJAX, Java Script, JNI, Unit testing.

Description:

- Implemented new features in a Struts 2.0-based application.
- Mentored entry-level peers and assisted junior developers in resolving technical blockers.
- Introduced process improvements to enhance team efficiency.
- Optimized performance by refactoring JNI code into native Java implementations.
- Executed UI-level optimizations to improve responsiveness and user experience.

Company: Persistent Systems Limited (Client: Critical Path)

From Date: 02/2008, **To Date:** 02/2012

Location: Pune, IN

Job Title: Module Lead

Technical Skills Used: Linux, Solaris, JDB, WinSCP, FTP, Log Analysis.

Description:

- Directed a team of 10 engineers, fostering collaboration and high performance.
- Facilitated daily stand-up meetings to synchronize priorities, progress, and impediments.
- Managed Level 2 support for Memova messaging applications, swiftly resolving escalated incidents.
- Delivered targeted solutions for customer-blocking issues, ensuring uninterrupted service.
- Orchestrated two on-site deployment initiatives, executing end-to-end rollouts successfully.

Education

University: North Maharashtra University, Jalgaon, Maharashtra, IN

Degree: Bachelor of Engineering

Specialization: Computer Engineering

Result: 64.94%

Personal Details

Date of Birth: 27 February 1986

Marital Status: Married

Passport Validity: June 2026 *[Renewal in progress]*

UAE Work Visa Validity: Jan 2027

Favourite Pastimes: Watching OTT programs, Portrait Drawing, and Numismatics.

Self-Declaration

I hereby declare that the information contained in this resume is factual and accurate to the best of my knowledge.
